

ELECTRICAL & CONTROL SYSTEMS INSTALLATION

In addition to supplying complete turnkey BMS projects, Comfort Controls undertakes a wide range of electrical installation work and PAT Testing, as well as more specialised control systems installation, programming and commissioning.

We work with both end users, manufacturers and systems integrators where our experience in BMS adds genuine value to our service and sets us apart from more general electrical contractors. Not only do customers benefit from our hands-on BMS installation experience, but we are able to provide useful advice in the planning stages and whilst on site, for a more effective and efficient installation.

- Power and Controls Wiring, including Containment
- Metering Installation
- Access /Security Installation
- CCTV Installation
- Electrical Inspection and Testing
- Portable Appliance Testing (PAT)

NICEIC approved, all Comfort Controls electricians are both experienced and fully trained for total reliability and quality installation work.
